

Discharge Summary & Hearing Screenings

Discharge Summary

In VISITS-I, Discharge Summary information is in the same screen as Initial Screening information which caused problems with reporting of post-discharge information and created confusion in reporting and follow-up. So, the flow of the application is changed to collect Status/Discharge information and Initial Screening Results separately.

Only birth hospitals OR transferred to hospitals can enter discharge summary. Only hospital entering discharge summary can enter initial screening.

Click on DISCHARGE SUMMARY link. No discharge summary records were found for this child.

Click NEW button

Date Discharge / Transfer	Date Created	Discharged Before Screening	Hospital Transferred To	Reported By
		None		

New

HELP VLDS5

Enter MEDICAL RECORD NUMBER if this is not pre-populated from EBC data entry.

Click and select NO for DISCHARGED BEFORE SCREENING. (YES will be used in cases where parents refused, transfers etc.)

Enter a date for DISCHARGED DATE (when the child was discharged from the Reporting Hospital)

REPORTED BY is always defaulted to the facility which the logged in user belongs to.

If there are any RISK INDICATORS, they can be tied to this Discharge Summary from this page. Risk Indicators are entered and saved in a different way than VISITS-I. In the old application, free text was entered for Risk Indicators. In VISITS-II, majority of Risk Indicators are categorized and sub-categorized. This will help the users report quality data for such key elements like Risk Indicators used for reporting.

In VISITS-II, Risk Indicators are tied to the screenings than to the child. The Risk Indicators entered at the Discharge Summary will be displayed in Initial Hearing and Hearing Rescreening pages. Users can change/add Risk Indicators in those screenings

but those Risk Indicators will be tied to the screenings thus giving an ability to go back and view the history of the Risk Indicators for each screening(s)

The Risk Indicators window displays only few choices but the rest of the choices can be viewed by scrolling the area up/down.

Check the RISK INDICATORS that apply and press SAVE button.

Special Circumstances: 02/08/2010 ADOPTION

Child's Name: JOHNSON, SHAWN
Date of Birth: 02/08/2010
Child ID: 4220

Pending Reg. Entry: None

Discharge Summary

Medical Record No.: 201002081254
Discharged Before Screening: NO
Reason Not Screened: [Empty]
Discharged to Home Date: 02/11/2010
Hospital Transferred To: [Empty]
Transferred Date: [Empty]

HELP

VISITS

The Discharge Summary is successfully saved. Note that the SAVE button now disappeared from the page indicating that once the discharge summary is entered and saved, it cannot be modified.

Note that additional menu options to enter Initial Hearing screening in the left navigation bar.

A child can have multiple Discharge Summaries (ex: Child transfers to another facility)

One other important feature in this application is the capturing of audit related information (ex: record created by, created date, modified by and date modified). This information is displayed at the bottom of pages, where applicable.

Initial Hearing Screening

Only hospital entering discharge summary can enter initial screening. Initial Hearing Screening can be entered only if Discharged Before Screening = NO. Before the Initial Hearing Screening is entered, Provider information must be entered.

Click on INITIAL HEARING SCREENING link.

Enter SCREENING DATE (date on which the child's Initial Hearing Screening was performed).

Click and select a value for SCREENING SETTING (place where the screening was performed). The list for Screening Setting contains more values but hospital user can only use few values.

Click and select a value for SCREENING TEST (hospital user cannot use all the values from the list)

Enter the name for PERSON ADMINISTERING SCREENING.

Click and select a value for LEFT/RIGHT EAR RESULTS.

REPORTED BY is always defaulted to the facility which the logged in user belongs to.

Note that the Risk Indicators from Discharge Summary are carried into Initial Hearing Screening. Should you decide to change these risk indicators and save the record, you will still be able to view what the risk indicators were initially from the Risk indicators screen (described later in this document)

Upon successfully saving the screening, the SAVE button will be disabled. This screening can no longer be edited by hospital user. Any modifications to the screening will have to be referred to OFHS. Once a screening is entered, it cannot be deleted by hospital users.

Hearing Re-screening

The Hearing Re-screening screen can only be accessed after the hospital user has entered an initial screening has been entered. Additionally, although there can only be one Initial Hearing Screening for a child, there can be multiple Hearing Re-screenings as long as the record is not closed. Only hospital entering Initial Hearing Screening can enter Hearing Rescreening.

Click HEARING RE-SCREENING link

Enter SCREENING DATE (date on which the child's Hearing Re-Screening was performed).

Click and select a value for SCREENING SETTING (place where the screening was performed). The list for Screening Setting contains more values but hospital user can only use few values.

Click and select a value for SCREENING TEST (hospital user cannot use all the values from the list)

Enter the name for PERSON ADMINSTERING SCREENING.

Click and select a value for LEFT/RIGHT EAR RESULTS.

REPORTED BY is always defaulted to the facility which the logged in user belongs to.

If the Risk Indicators are changed in Initial Hearing Screening, then the latest Risk Indicators will be pre-populated into Hearing Re-Screening page.

Enter all the required items and press SAVE button to save the hearing re-screening.

If both ear results are entered as PASS/PASS, then previously entered risk indicators would be removed. A message will be displayed to confirm the action.

Press OK button to remove the Risk Indicators. An entry will be created automatically in the Status Details page. The record created will have the Reason Closed as PASS/PASS/HWNL (Hearing With-in Normal Limits). The Blue header bar will display that the child is HWNL.

Since the record is now closed, a message 'Hospital user can not create Screening since Child is closed' will be displayed if the users tries to create a new hearing rescreening

Risk Indicators

The history of Risk Indicators can be found on the Risk Indicators page. Click RISK INDICATORS link.

The screenshot shows the VISITS system interface. The top navigation bar includes 'Special Circumstances: 02/08/2010 ADOPTION', 'Child's Name: JOHNSON, SHAWN', 'Date of Birth: 02/08/2010', and 'Pending Reg. Entry: None'. The 'Risk Indicators' section is highlighted with a red box and contains the following table:

Date	Type	Risk Indicator(s)	Sub-Risk Indicator(s) / Comments
02/11/2010	Discharge Summary	Family history of permanent childhood hearing loss.	Mother of child Brother of child
02/09/2010	Initial	In utero infections.	Subella
02/09/2010	Initial	Family history of permanent childhood hearing loss.	Mother of child Brother of child
02/09/2010	Initial	In utero infections.	Subella

This page displays the details of Risk Indicators along with the screenings they are associated with. Click on the Risk Indicator Date to view the screening details

The screenshot shows the 'Discharge Summary' page for child JOHNSON, SHAWN. The page includes the following information:

- Medical Record No.: 201002081254
- Reason Not Screened: [Dropdown]
- Hospital Transferred To: [Dropdown]
- Reported By: HENRICO DOCTORS' - FOR
- Discharged Before Screening: NO
- Discharged to Home Date: 02/11/2010
- Transferred Date: [Dropdown]

The 'Risk Indicators' section is highlighted with a red box and contains the following table:
